YOUR TECHNICIANS NEED OUR OPTICS AND LASER TRAINING!

ATTENTION EMPLOYERS

Expand the skills of your technicians with a solid foundation in optics and laser concepts through our flexible, convenient and customizable training courses.

See How Our Optics and Laser Training Can Help Your Technicians

OP-TEC provides a foundation for technicians to develop a basic understanding of the use of lasers and optics enabling technicians to work more accurately, effectively, safely and innovatively.

FOCUSED

Content your technicians need to perform and succeed.

ONLINE COURSE CONTENT MODULES

Basic properties of light
Techniques for properly and safely handling optical equipment and lasers
Fundamental principles of geometric and wave optics
Overview of how lasers operate
All presented in a highly interactive method that includes streaming video

ACCESSIBLE

Interactive online content delivered on web-connected desktop and mobile devices.

LABORATORIES

Labs can be taught at an OP-TEC Partner Community College Facility near you. Schedules for conducting labs are coordinated with employers to provide maximum educational benefit while meeting workplace demands.

HANDS ON

Laboratories delivered at a partner college near you by OP-TEC trained faculty.
