Re: Statement of Commitment

Dear Dr. Panayiotou,

As a consumer of precision optics, we are committed to support the OP-TEC, Center for Occupational Research and Development (CORD) and Indian River State College (IRSC) in their efforts to be part of a national AAS Precision Optics Program. We will assist in whatever capacity we may in developing this precision optics education curriculum at IRSC to best prepare students for employment in the companies that supply the precision optics that are critical to the mission of our servicemen and women serving in combat zones, today. We can provide instructional training assistance and lectures, student internships to introduce students to an optics industry career and whatever other resources are appropriate to assist IRSC in this worthwhile endeavor.
