Re: Statement of Commitment

Dear Dr. Panayiotou:

VLOC, a subsidiary of II-VI, Incorporated, is a precision optics employer located in the state of Florida. VLOC is committed to support the OP-TEC, Center for Occupational Research and Development (CORD) and Indian River State College (IRSC) in their efforts to be part of a national AAS Precision Optics Program. We will work as advisors in developing this precision optics education curriculum at IRSC to best prepare students for employment in our company. VLOC has and will continue to support internships to introduce students to an optics industry career as well as providing training and education assistance for employees in the precision optics and thin film coating technical field. VLOC can support lectures, presentations, facility tours and equipment demonstrations to potential students as needed to support this program. Under the right circumstances, VLOC could also loan or donate equipment as needed by the IRSC.

We look forward to working with your organization and invite you and your team to visit our facility at any time to support your efforts.

Sincerely,

Steve Sacone  
General Manager
